

Residents declare war on the Grease Menace.

Here's the battle plan:

- Make sure your kitchen drains have screens.
- Throw grease and table scraps in the trash.
- Never pour grease or oil down the drain.
- Wipe or scrape dishes before washing.
- Don't use hot water and soap to wash grease down the drain – it will cool and harden in the sewer line.

GREASE MENACE

GREASE MENACE

A real
PAIN
in the
Drain

How does the Grease Menace get into your sewer?

When you put cooking waste, like grease, oil and food scraps, down the drain, it clings to the sides of your sewer pipes. This **Grease Menace** clogs your pipes and causes sewer back-ups.

Grease is a menace to your sewer line.

Never pour grease down the drain.

Here is why....

- It clogs your sewer line, resulting in an expensive visit from the plumber .
- It plugs city sewer lines and makes it harder to treat waste water . The cost of cleaning and repairs leads to higher sewer rates for you.
- It causes sewer back-ups which are hazardous to your health and harm the environment.

Fight the Grease Menace:

- 1 Pour grease from cooking into a can, let it cool, and throw it in the trash.
- 2 Throw food waste into the trash; not down the drain.

Recycle all used fryer oils. Residents can recycle oils at the:

- 3 **Vacaville Sanitary Service Recycling Center at 855½ Davis Street, Open Saturdays 9am to 2pm**
