

Name: Matthew Brock

Age: 32

Occupation: Operations and Maintenance Supervisor, Water District

Education and Qualifications: I am running for Vacaville City Council to do what I can to ensure the City makes sound and logical decisions in all aspects. While employed with the local irrigation district, I saw large amounts of farmland developed. I believe agriculture was and is a huge part of history in this area, open areas and greenbelts need to be preserved. There have been recent developments that have led to traffic issues and more, I believe many of these were hurried through to bring in needed revenue to supplement spending.

My primary goals are to 1) Protect public safety, police and fire services, 2) Ensure community services and youth programs are funded and available to all residents, 3) Develop the Downtown area in to a prosperous and productive destination with input from existing businesses, 4) Better evaluate proposed projects through expanded outreach with neighbors, 5) Locate and research inefficiencies and explore potential revenue sources and opportunities for savings, 6) Support needed infrastructure upgrades within the city's utility network, particularly source water quality.

If I am elected, I will serve with integrity and pride to ensure Vacaville is a place we are all happy to call home now and into the future.
