# OPERATING BUDGETS

This page intentionally left blank

# City Attorney's Office

The City Attorney's Office provides a wide array of in-house legal services to all City Departments and the City's Legislative Bodies (the "City"), including representing the City in litigation and administrative hearings; preparing ordinances and resolutions; reviewing and preparing contracts, leases, and other legal documents; researching and preparing legal opinions on matters affecting the City; and, advising the City on various legal matters. The City Attorney's Office also serves as legal counsel to the Solano Animal Control Authority and the Vacaville/Dixon Greenbelt Authority.

The City Attorney's Office does not provide legal advice or services to the public. However, the City Attorney's Office – along with other City Departments – provides information to the public on matters involving the City.

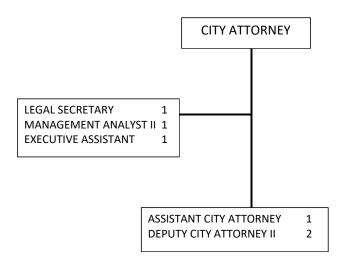

The City Attorney is appointed by the City Council. The City Attorney's Office is compromised of the City Attorney, one Assistant City Attorney, two Deputy City Attorneys, one Management Analyst, one Paralegal, and one Executive Assistant.

#### **BUDGET HIGHLIGHTS**

Last fiscal year, for the first time since 1995, the City Attorney's Office added a new attorney to meet the demands of the Office as of 2021. Need for the new attorney was palpable given the increased volume and variety of legal demands facing the Office during the intervening 26 years, which were due in part to the City's exponential growth, increased and ever-changing legal requirements on local governments, and the transition to a seven-member City Council.

The City Attorney's Office remains committed to helping the City achieve its strategic plan goals. In doing so, the City Attorney's Office drafts contracts and other legal documents necessary to implement the strategic plan goals and implementation strategies and provides related legal and policy advice to all City Departments. Further, the City Attorney's Office is working with the City Manager's Office to implement an Enterprise Risk Management program targeted for FY23.

# City Council & Treasurer

The City of Vacaville is a general law city with a Council-Manager form of government. The City Council is comprised of seven members, including members representing six districts and the Mayor who is elected "at large."

The City Council acts as a legislative and policy-making body. The responsibilities of the City Council are to establish and approve the local laws, policies, and budgets that guide the current operations and future direction of the city. The City Council also serves as the governing body of the Successor Agency to the Redevelopment Agency, Housing Authority, Groundwater Sustainability Agency, and Public Financing Authority of the City of Vacaville, with no additional compensation for their roles on those boards. The City Council appoints the City Manager and the City Attorney.

The City Treasurer is also an at large elected position with a four-year term. The responsibility of the City Treasurer is to assure the proper handling and recording of all municipal funds and overseeing the investment of these funds. The legal requirements of the City Treasurer are outlined in the California Government Code: Sections 41001 through 41007, which outline the primary statutory duties of City Treasurer in general law cities. These duties were transferred to the City of Vacaville Finance Director in 1970.

The City Treasurer reviews the monthly investment report to ensure that the Investment Policy of the City of Vacaville remains consistent with the City's Investment Policy objectives, current law, and economic trends. The Investment Policy is presented annually to the City Council.

### **BUDGET HIGHLIGHTS**

The proposed FY22/23 budget is a direct continuation of the FY21/22 budget.

# City Manager's Office

The City Manager is appointed by the City Council to serve as the chief executive officer of the organization. In addition to providing support to the City Council and administrative direction to City departments consistent with Council policies, the City Manager's Office (CMO) is responsible for intergovernmental relations, government affairs, information technology, public relations, and program and risk management. The department also facilitates the special event review committee and responds to all calls to the City's general information phone lines.

Overall, the City Manager's Office oversees the operations of the City in a manner consistent with the City's core values of: accountability, responsiveness, innovation, and inclusiveness. A major effort of the Department is focused on ensuring the long term viability of the community through the development and administration of programs to enhance city revenues, economic development to generate jobs for our residents, and providing for the overall quality of life for our community.

#### **BUDGET HIGHLIGHTS**

The proposed FY22/23 budget reflects refinement of recent restructuring efforts within the City Manager's Office to strengthen our service delivery to the Council, community, and organization. These changes will continue staff's efforts to better serve the growing demand placed on the organization, in addition to helping us be responsive to the 5-year Strategic Plan Goals and Initiatives. This includes the promotion of the Deputy City Manager to Assistant City Manager so that additional services and new programs can be provided to better serve the Council and the community.

Included in the proposed budget is training related to staff expansion and enhanced coordination and strategic planning among staff within the City Manager's Office and other departments. This investment would indirectly impact all other initiatives as enhanced training and coordination enable staff to effectively meet a variety of challenges.

**Information Technology:** The Information Technology Division provides significant support to the City's infrastructure. The Information Technology (IT) Division provides 24/7 365 days of technical support for all City employees and computer systems, implements technology projects, GIS, and provides long-range planning and improvements related to technology within the City. The IT Division has been working to

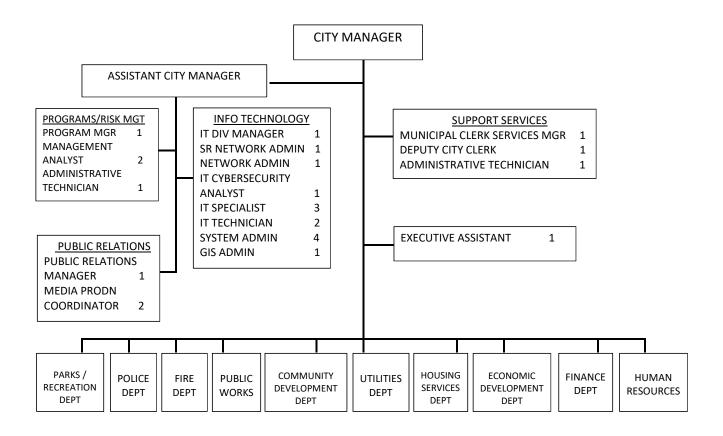

implement the Technology Strategic Plan and Geographic Information System (GIS) Master Plan.

The proposed FY22/23 budget also includes two augmentation requests, which are both consistent with the 5-year Technology Strategic Plan and advancement of Initiative 4B: Rebuild City Support Services. The first request is to convert the existing part-time IT Technician into a full-time position. This would provide four full-time IT Technicians to staff the Help Desk. The timely response of IT to Help Desk items keeps the City running effectively and therefore has an indirect effect on all other initiatives.

The second request is to fund a full-time System Administrator II focused on public safety. The addition of this position is supported by the Technology Strategic Plan and it is anticipated that this will result in enhanced service delivery as well as coordination between IT and public safety departments. This investment would support both strategic initiatives within Goal #1 – Ensure Public Safety.

**Public Relations:** The proposed FY22/23 budget for Public Relations includes a budget augmentation request to fund the implementation of a new vision for public relations within the City of Vacaville. This includes funding to add a seasonal intern, a part time position to increase engagement with our Spanish speaking community members, website enhancements (including language translation), increased broadcasting capability, advertising and public outreach, enhanced staff training, and the incorporation of a variety of tools to increase effectiveness and efficiency in the delivery of information to the community, stakeholders, and visitors. This investment aligns with several of the City Council's strategic initiatives including newly added Initiative 5A: Promote Community Engagement and Increased Equity and Inclusion.

### Community Development Department

The Community Development Department facilitates community and land development activities and services. These services include long range visioning and planning to help the community realize their land use, environmental, economic, and transportation goals, facilitating the approval of development projects to achieve those goals, and the inspection and monitoring of development to ensure a safe community environment. The Department budget has five parts: Administration, Building Division, Current Planning Division, Advanced Planning Division, and Planning Commission.

### **BUDGET HIGHLIGHTS**

The FY 2022/23 budget anticipates a busy year in all aspects of community development activity. A number of major development projects are underway involving both the planning and building staffs. While two major development projects in northeast Vacaville are anticipated to conclude during calendar year 2022, there are new major projects on the horizon and significant building permit activity particularly in the area east of Leisure Town. The budget anticipates continuing activity to provide services for the level of construction activity that has remained steady.

The budget includes a General Fund contribution of \$500,000 similar to prior fiscal years.

### **Building**

FY 2021/22 was a busy year for building construction. It is anticipated that building activity will remain steady or possibly experience a slight decrease, but general levels of activity are expected to remain consistent with FY 2021/22.

An increasing number of permits can be handled online which creates efficiency for both permit issuance and inspection services. It is anticipated that the Building Division will continue to be involved in implementing greenhouse gas reduction efforts through improved procedures for issuance of solar permits and in inspecting for proper installation of water quality and environmental mitigation to meet the requirements of the California Building Standards.

### **Advanced Planning and Current Planning**

In FY 2022/23, planning staff will continue to provide both long-range policy planning and current development review planning services to the community.

In FY 2021/22, the two Planning Divisions were consolidated under one manager and an Assistant Director role replaced one of the City Planner positions. The City Planner classification was subsequently eliminated and the Planning Manager position created. Under this reorganization, the Senior Planner for Current Planning and the Senior Planner for Advanced Planning supervise their respective work groups and report to the Planning Manager.

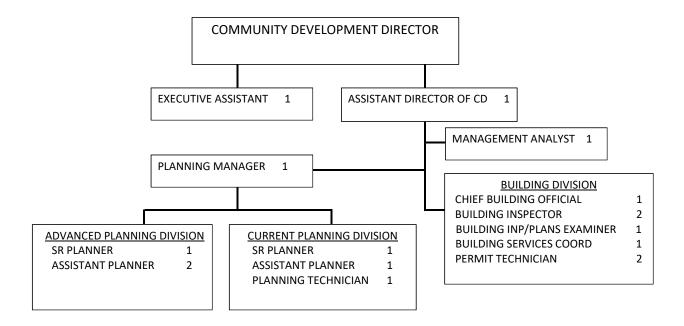

The FY 2022/23 budget proposes to add a Management Analyst to provide budget administration support and to assist with process improvements, and a Permit Technician to assist with customer service activities including building permit intake and permit processing.

Development review activity appears strong with continued single family residential construction in Vanden Meadows, Roberts' Ranch, Farmstead, and North Village. Commercial, multi-family residential, and industrial projects are also under review, along with community projects to improve parks, the Rocky Hill Trail, and other community facilities. For FY 2022/23, the Planning staff will also focus on several major projects:

- o Continued coordination with the Bio-Manufacturing Initiative, including initial planning work for the Northeast Growth Area
- o Implementation of the Downtown Specific Plan
- Implementation of the updated Land Use & Development Code
- Completion of the Green Tree Specific Plan
- o Completion of the North Village Area Plan 2 Specific Plan Amendment
- Housing Element Update and associated rezonings
- Implementation of the Housing Analysis and Strategy
- o Commencement of planning for the Allison Priority Development Area (PDA)
- Implementation of the Energy & Conservation Action Strategy (ECAS) Update
- CEQA Support for City Departments

The activities summarized above support overall enhancement of the community. The department's tasks mesh well with the City's Strategic Plan initiatives to articulate an economic development strategy, promote housing for all, manage the impacts from growth, and encourage community engagement.

# Economic Development Department

The Economic Development Department is responsible for oversight of a multi-faceted economic development strategies recently approved by City Council. The focus will continue to be on COVID economic recovery, business retention, expansion, and attraction efforts especially in the biotechnology and advance manufacturing industries. These activities are related to the Council's first strategic goal priority: Articulate a Current Economic Development Program. The approved implementation strategies within this strategic priority are:

- 1. Invest in proactive Economic Development strategies that capitalize on the City's strengths.
  - a. Implement Biotech & Advanced Manufacturing Strategies.
- 2. Implement COVID-19 Economic Recovery & Tourism Strategies.
- 3. Expand relationships with existing partnerships to help promote local workforce readiness and meet local business needs.
  - a. Travis AFB, Solano College, Local School Districts & County Workforce Development Board
- 4. Develop a citywide business incentive plan that fosters economic diversification (i.e. infrastructure investments, incubator programs and grow local entrepreneurs).
- 5. Create an efficient development approval process.

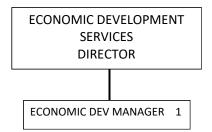

### **BUDGET HIGHLIGHTS**

The proposed FY22/23 budget remains a combination of Measure M and General Fund and has been refined to address the unique challenges and opportunities of the economy. The proposed budget includes augmentation requests, which are summarized below, supportive of the Solano County Small Business Development Center, Phase 3 of the Biotech Strategy, and the need for data analytics:

- 1. Provide funding to support the Solano County Small Business Development Center to facilitate the Vacaville Manufacturing Group. Specifically, this investment aligns with strategies 1, 2, 3, and 5.
- 2. Provide ongoing funding for Phase 3 of the Biotech Strategy including membership in the California Biomanufacturing Center (CBC) and ongoing contract costs in excess of this year's one-time budget augmentation request related to the CBC's assistance with the City's attraction and retention efforts of Biotech companies including events such as Bio International, the American Biomanufacturing Summit, and the San Francisco Business Times Biotech Forum. Specifically, this investment aligns with implementation strategies 1-4.
- 3. Provide funding for the purchase of data resources and tools to support data-driven decision making to target and measure the effect of Economic Development efforts within the City of Vacaville. This request specifically includes ongoing funding for the following tools, which advance the implementation of strategies 1-3:

- Applied Economics Economic Impact Analysis tool provides Economic
  Development staff to calculate the economic impact of a potential business that
  either chooses to locate in Vacaville or expand existing operations. Staff will be
  able to measure the impact of those efforts in terms of job creation, City revenue
  streams, etc.
- Placer.Al data provides a clear picture of where Vacaville Residents travel to work, shop and/or recreate while in or outside of Vacaville. This data can inform attraction and expansion efforts by helping us understand the skillset of residents that leave the City of Vacaville for work.
- eImpact provides enhanced dashboard data to allow both Economic Development staff and the public access to real-time data on the City's economic condition and climate.
- Finally, a site selection database that allows Economic Development staff to connect with site selectors around the world and provide information about opportunity sites within Vacaville, and demonstrate that Vacaville is a viable location for numerous industries to locate facilities.
- 4. As we enter Phase III of the City of Vacaville's Biotechnology Initiative it is time to invest in marketing and advertising. Telling our story as to why Vacaville is the best place for a business to locate/grow. This request specifically includes ongoing funding for the following efforts, which advance implementation strategies 1 and 2:
  - A dedicated custom content insert in the San Francisco Business Times'
    publication that is distributed in concert with their annual Biotech Summit, which
    attracts movers and shakers in Biotech companies in the Bay Area. This custom
    content insert will demonstrate why Vacaville's location, amenities, and workforce
    make Vacaville the logical home for Biotech companies looking to relocate or
    expand.
  - Sponsorship and inclusion in Genesis' American Biomanufacturing Summit, a local boutique event bringing key players to the same table to discuss the future of Biomanufacturing in the area and provides Economic Development staff direct access to Biomanufacturing Companies that are actively looking for expansion locations. Funding to attend this year's event was made possible through the approval of a mid-year budget augmentation.
  - Sponsorship with Team California for the Bio International Conference is the
    world's largest trade show representing biotechnology companies, academic
    institutions, state biotechnology centers and related organizations across the
    United States and in more than 30 other nations. This event brings key players to
    the same table to discuss the future of Biotechnology. With the assistance of the
    California Biomanufacturing Center meetings are being scheduled for Economic
    Development staff to meet Biotechnology companies that are actively looking for
    expansion locations.
  - Finally, advertising and site selection magazine will showcase to site selection professionals that Vacaville's long-established and growing Biotech industry makes it an ideal location for new development and expansion.

### Finance Department

The Finance Department is responsible for the financial accounting and reporting systems; city-wide budget preparation and administration; purchasing, accounts payable and accounts receivable; water meter reading, utility billing and collection; and business license administration. Finance manages the cash and investment portfolio, as well as ongoing administration of the City's long-term debt transactions and community facilities districts. The Finance Department has received state and national awards for excellence in financial reporting for the past 30 years. The Finance Department is a service-oriented Department with a focus on providing excellent customer service. The staff takes great pride in their work.

#### **BUDGET HIGHLIGHTS**

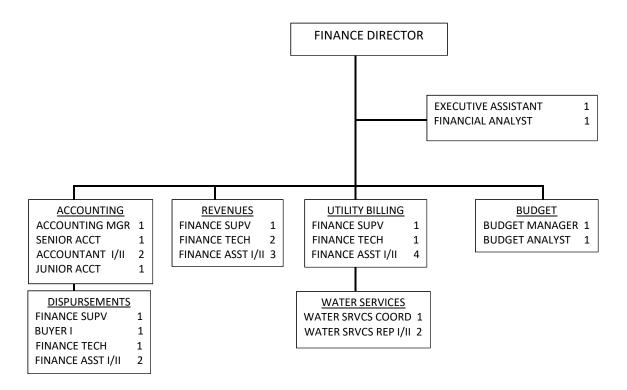

The Finance Department provides revenue accounting and invoice processing for Solano Transportation Authority (STA) and accounting services to Community Action Partnership Solano (CAP Solano). In partnership with the Human Resources Department, these activities will generate approximately \$75,000 in revenue.

Implementation of the new Enterprise Resource Planning (ERP) system was completed during fiscal year 2021-22 with the new utility billing module going live in fall/winter 2021. In the upcoming fiscal year, Finance will complete the revamping of the budget and expense transparency portal, Socrata, which will give users a more inclusive, up-to-date look into the City's financial operations. Additionally, furthering our customers' ability to make online payments for all City services remains a goal of the department.

This year's proposed budget includes the addition of two positions, a Finance Supervisor and Junior Accountant. The additions will allow the accounting and accounts payable sections to more efficiently handle its large workload while also providing excellent customer service to staff and vendors.

The Finance Department will be instrumental in continuing the efforts of Strategic Plan initiatives 4A (Ensure Fiscal Sustainability). Planning additional discretionary payments (ADPs) to CalPERS to address the city's pension liability and save on long-term interest costs is a strategy the Finance Department will be implementing in the upcoming fiscal year.

# Fire Department

The Vacaville Fire Department (VFD) provides community risk reduction and emergency services to the City of Vacaville. Community risk reduction services include fire prevention, code compliance, construction plan review, construction inspections, fire investigations, and fire and life safety public education. VFD firefighters are all-risk emergency responders and provide a variety of services including fire suppression, emergency medical services, ambulance transport, hazardous materials response, technical rescue, water rescue, and any other non-fire emergency response. VFD's emergency medical transport serves the City of Vacaville as well as 160 square miles of unincorporated area adjacent to the City.

Call volume increased to 12,546 total fire and Emergency Medical Service (EMS) incidents in 2021, as compared to 11,208 incidents in 2020. This was an increase of 12%. Medical emergency incidents also continue to rise in volume. Overall unit responses increased to 22,676 in 2021 from 20,894 in 2020.

### **BUDGET HIGHLIGHTS**

### **Services and Supplies**

Firefighter safety is a critical concern for the City of Vacaville. We depend on the health and well-being of our firefighters to best serve the community. Therefore, in March 2022 City Council unanimously authorized the Fire Chief to enter into an agreement for contract services with Life Extension Clinics for annual firefighter physicals for a total contract cost of \$66,000. This service provides firefighter specific annual physicals with early detection testing for all fire suppression personnel pursuant to the National Fire Protection Agency standards outlined in NFPA 1582 and NFPA 1583.

### Personnel

Beginning in FY 22/23 the Fire Department will implement an Apprentice Firefighter Program. This program will create an internal pathway to develop firefighter and firefighter-paramedic candidates in-house. It will recruit primarily from local youth, including the successful Fire Explorer Program. During a two-to-four year apprenticeship, participants will work in the Fire Department while being provided the training, education and experience required to become journey-level fire service professionals.

Additionally, the Fire Department will be holding an 18-week in-house academy for new hires beginning in FY 22/23. The new hires are required to fill existing vacancies and anticipated retirements in the upcoming year. The salaries and benefits budget will be

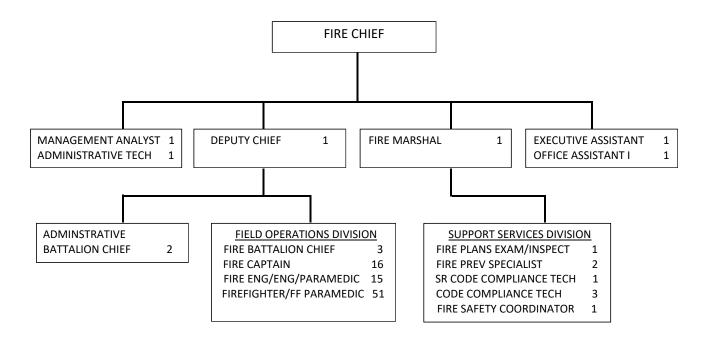

1

increased by \$255,000 to pay for backfill and overtime costs associated with teaching the academy on a temporary assignment. The instructors' regular field assignments must be backfilled while they are assigned to the academy.

The Fire Department is expanding our full-time employees (FTE's) by one position with the inclusion of a Senior Code Compliance Technician in the FY 22/23 budget. This position will oversee the Code Enforcement Division and report directly to the City of Vacaville Fire Marshal.

The Fire Department will focus on many of the goals outlined in the City's Strategic Plan; primarily on goal 1, to ensure public safety and evaluate staffing models and facility demands to meet future service delivery needs. Additionally on goal 4, to maintain effective and efficient services. And lastly on goal 5, to promote community engagement and increased equity and inclusion.

# Housing & Community Services

The Department of Housing and Community Services (DHCS) takes great pride in its role in improving the quality of life for Vacaville's residents. This work is accomplished through three divisions: Administration Division, Housing Division, and Community Services Division. In addition, the Department completes special projects. The following provides a brief overview of the DHCS work and FY 2022-2023 budget highlights.

Administration Division is responsible for department-wide office management and administrative activities. This includes, but is not limited to: grant fiscal oversight through quality control and program regulatory compliance monitoring; tracking and monitoring administrative contracts; coordinating recruitment, hiring, orientation, personnel actions; ensuring Department/City policies and procedures are followed; assisting in staff training (development opportunities/ performance evaluation feedback/workflow processes); maintaining operational efficiencies and records of department actions/functions (e.g. accounts payable/receivable, maintenance agreements, purchasing cards; meetings/agendas, etc.), and providing "first contact" customer services to callers and front counter customers.

### **<u>Housing Division</u>** includes all housing related programs:

- Vacaville Housing Authority (VHA) has been funded by the U.S. Department of Housing and Urban Development (HUD) since 1976. Staff administers the Housing Choice Voucher (Section 8), Family Self-Sufficiency, and Homeownership Programs. A portion of Housing Choice Voucher funding is allocated to special programs: Family Unification Program, Veterans Affairs Supportive Housing, Mainstream Housing Vouchers, and Emergency Housing Vouchers. The VHA is now a Move to Work agency. These programs improve living conditions and promote self-reliance for approximately 1,300 very low-income Vacaville households each month, investing approximately \$12.75M in the Vacaville rental market.
- The Division also contracts to administer the same programs for Solano County. The Solano County program is significantly smaller than Vacaville's program, serving almost 370 very low-income households in the Cities of Dixon and Rio Vista and in the unincorporated areas of Solano County each month.
- The HUD certified Housing Counseling Center works to provide clients with as much information and education as possible to help them succeed in the areas of homeownership, financial literacy, and obtaining and maintaining rental housing.
- Affordable Housing Programs include: first time homebuyer down payment assistance loan programs; monitor, preserve, and support new construction of affordable housing; implement components of the upcoming Housing Strategy, etc.

<u>Community Services Division</u> is responsible for: administering the Community Development Block Grant Program through annual entitlement funding from HUD; assisting with City homelessness initiatives, projects, and programs; and oversight of contracts to administer grants on behalf of the Community Action Partnership Joint Powers Authority (expenditures are primarily funded through available administrative grant funding provided through the JPA).

<u>Special Projects</u> are implemented by the DHCS as appropriate. This includes the work necessary to "wind down" the former RDA by ensuring payment of "enforceable obligations," interacting with the state and county on former RDA financial and related matters and preparing and providing documentation and information to the State Department of Finance and Controller's Office and Solano County Auditor-Controller's (SCAC) office as requested or required. In addition, the DHCS will implement Capital Improvement Projects such as the Mariposa Center Improvements and Brown Street Multi-Purpose Building/New Park/Community Center.

### **Budget Highlights:**

The DHCS budget anticipates an increase in funding for the Housing Division for new construction affordable housing projects. This year, a self-service kiosk and workstation will be implemented as well as additional staffing (Housing Services Administrator, Administrative Technician) added to increase efficiencies and customer services for the Section 8 programs. The Community Services Division also anticipates an increase in funding due to the CDBG CARES funding and related programs/expenditures. The DHCS budget incorporates the following goals:

### Housing Division:

- Provide Section 8 rental subsidy on behalf of approximately 1,300 very-low income Vacaville households and 370 very-low income households under the County program each month.
- Assist Housing Choice Voucher households to achieve self-sufficiency and economic independence and/or homeownership.
- Implement self-service kiosk and workstation for customers.
- Adding Project Based Vouchers to support affordable housing developments.
- Open Section 8 waiting lists, as appropriate, to accept new applications.
- Provide Housing Counseling Services.
- Work with developers on pre-development activities for the Oak Grove and Allison Drive affordable housing projects.
- Work with owners of existing affordable housing to improve and preserve units.
- Monitor 159 agreements covering 1,106 rent restricted apartments and single-family units.
- Provide First-Time Homebuyer Down Payment Assistance loans.

• Implement components of the Housing Strategy.

### Community Services Division:

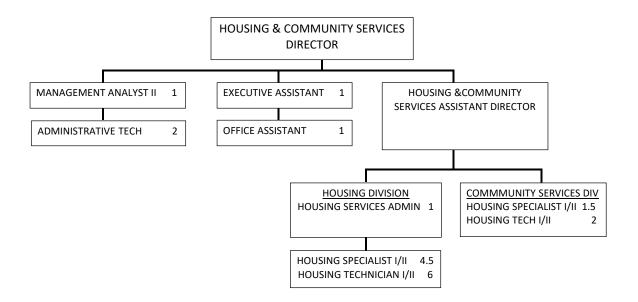

- Support youth and other programs at CDBG neighborhood centers and improve building space at Eldridge Avenue if needed due to the age and condition of the facilities.
- Administer a Sidewalk Repair Program.
- Prevent, prepare for, and respond to COVID-19 through mental health, homeless facility, food security, and homelessness prevention and diversion funding.
- Assist with initiatives to address homelessness.
- Oversee regional grants on behalf of the CAP Solano, JPA.

### Special Projects:

- Continue "winding down" the former RDA.
- Make improvements to the Mariposa Neighborhood Center.
- Continue work on developing the Brown Street Multi-Purpose and Recreation facilities: DHCS offices, non-profit space, new community room, and new park/outdoor public recreation components.
- Work to dispose of properties in the E Main-Mason and McClellan-Depot downtown area for the development of 700 Parc on Main.

The Housing and Community Services Department contributes to the City's Strategic Plan Goal 3, Protect Vacaville's Quality of Life.

Full-Time Employees are included in Housing Services Department.

### Human Resources

The Human Resources Department provides recruitment, classification, salary and benefits administration, payroll, workers compensation, safety, training and development, and labor and employee relations services. The Human Resources Department is a service-oriented Department with a focus on providing excellent customer service. The staff takes great pride in their work.

#### **BUDGET HIGHLIGHTS**

Human Resources continues to work with all departments to fill vacancies as the City experiences a significant and steady increase in retirements.

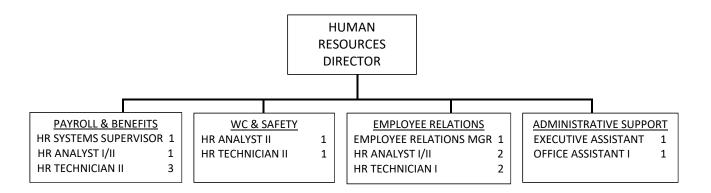

The Human Resources Department will be instrumental in continuing the efforts of Strategic Plan initiatives 4C (Build a Positive Organizational Culture and Workforce) and 4A (Ensure Fiscal Sustainability).

The Human Resources Department provides human resources and payroll services for Solano Transportation Authority (STA) and partners with the Finance Department to generate approximately \$75,000 in annual revenue for the City.

Human Resources is in the beginning phases of labor negotiations with Fire unions (contract expiration dates are October 31, 2022).

The addition of two Human Resources Analysts will assist with all of the above items along with continuing the day to day operations of serving our customers both internal and external. One analyst will be assigned to recruitment/classification and will assist the existing full time analyst with recruitments. The second analyst will be assigned to the payroll and benefits section. Both positions will also take on analyst level work from management positions above them allowing the managers to focus on strategic plan initiatives and other projects.

### Non-Departmental

The Non-Departmental budget funds operating costs of a general nature, not associated with a particular department. Examples include property tax administration charges imposed by the County; museum maintenance support; membership dues for the League of California Cities and ABAG; animal shelter and animal control costs; utilities cost not associated with a particular department; employee training programs; and the employee assistance program. The Non-Departmental budget includes a \$150,000 contribution to the library (allocated from Measure I revenues) and \$399,065 for the Motorola radio system contract and the maintenance of the Butcher Road tower site lease.

#### **BUDGET HIGHLIGHTS**

The proposed FY22/23 budget includes approximately \$215,000 for County property tax administration fees. In addition, \$1,067,252 is included for City's portion of animal control services with \$89,477 for capital improvement contribution, \$619,683 for shelter services and \$358,092 for animal control. The approximately \$5 million total capital cost for the shelter was amortized over 15 years and is spread to the cities and County based on their pro-rata share of facility use.

The Non-Departmental budget also includes over \$363,985 in memberships and contributions to various organizations including the Downtown Vacaville Business Improvement District (DVBID), the Vacaville Museum, Solano Economic Development Corporation, Vacaville Chamber of Commerce and the Small Business Development Center, as well as the Travis Community Consortium and the Local Agency Formation Commission. Regarding one-time funding in FY22/23, there is \$190,000 for a Citywide Landscape and Lighting District feasibility analysis and \$200,000 for the November 2022 election.

The FY22/23 budget funds citywide costs related to Homeless Services from Measure M as a community enhancement program. The proposed budget includes \$23,275 for Temporary Assistance Hotel Rooms; \$53,142 for Mental Health/Outreach Services; \$26,571 for Public Works Homeless Site Remediation, \$159,426 for sheltering services through Shelter Solano; and \$83,360 for contract services to work with our Community Response Team to remediate homeless encampments in Vacaville.

In addition, beginning in FY22/23, this budget includes \$2.2 million of Measure M funds to make an additional discretionary payment towards the City's CalPERS unfunded liability in an effort to pay the unfunded liability sooner than scheduled to save on interest costs.

### Parks & Recreation

The Parks and Recreation Department offers a wide range of recreational programs and special

events for residents of all ages and abilities, as well as operates the City's community centers, aquatic center, sports centers, parks and performing arts theatre. For budgeting purposes, the activities of the Parks and Recreation Department are grouped into four categories: Administration, Programs, Facilities and Community Well-being Programs. The latter three categories have different goals for cost recovery.

The *Administration* category supports a variety of activities related to programs, facilities and projects. Some items include park planning, project management, the production, printing, and mailing of the Events guide, part-time registration staff, recreation management, registration software system management, and department wide technology administration. In addition to this, administrative staff cultivate and maintain important relationships by acting as liaisons to a variety of community organizations and staff essential City bodies such as the Parks and Recreation Commission and the Arts Advisory Committee.

The *Facilities* category is comprised of buildings used for events, programs, trainings, meetings and private rentals, including the Vacaville Performing Arts Theater, Ulatis Community Center, Three Oaks Community Center, McBride Center, Walter V. Graham Aquatic Center, Harbison Event Center, Vacaville Recreation Center and Georgie Duke Sports Center. The higher level of General Fund support for this category reflects existing policies for subsidized community and other department usage of the buildings. The Vacaville Performing Arts Theater also receives an annual allocation from excise tax (Measure I) revenues.

The **Programs** category is responsible for the most significant portion of cost recovery through the "pay-to-play" classes, activities, and sports programs offered to the general population. These programs are expected to recover direct costs (e.g. staffing, supplies, and utilities) and to contribute toward the departmental and citywide overhead costs.

The **Community Well-being Programs** category includes programs and activities for seniors and teens, community-wide special events, and a developing therapeutic recreation program for disabled youth and adults. These programs receive a higher level of funding from the General Fund based on the needs and benefit to the community.

#### **BUDGET HIGHLIGHTS**

In FY 2022-23, the Parks and Recreation Department will continue expanding its program offerings to generate General Fund revenue while contributing to the health and wellness

of the citizens of Vacaville. In addition, the department has many exciting opportunities to increase the safety and quality of program capabilities through equipment replacement, facility maintenance, and park improvement projects through the numerous active Measure M, Development Impact Fee, and General Fund projects. By executing these improvements, the Parks and Recreation Department is being responsive to the City's Strategic Goals #1 Ensure Public Safety, #3 Protect Vacaville's Quality of Life and #4 Maintain Effective and Efficient Services.

#### **ADMINISTRATION**

The proposed budget includes augmentations for increases in non-full time staff and much needed full-time positions that will provide vital departmental support. These positions include an additional Recreation Supervisor, Park Planner, and an Administrative Technician for marketing. The addition of these positions will allow for effective responsiveness and efficiency in handling the increased departmental workload and ensures successful planning, management, and completion of the highly desired projects such as the Centennial Park Master Plan, Neighborhood Park Master Plans, and park improvement projects at locations like Sierra Vista and Alamo Creek Parks.

#### **FACILITIES**

In the upcoming fiscal year, Facilities are tasked with various projects that will improve the quality and safety of the buildings to support the expansion of events, programs, and activities offered to the public at these locations. Improvements to quality include an upgraded computer room at the McBride Center, a ceiling mounted projector at Three Oaks Community Center, and a kitchen grill addition to the Ulatis Community Center. Some planned upgrades in safety are repair and replacement of lifeguard chairs at the Graham Aquatic Center, and an expanded video surveillance system across multiple City Facilities. The FY 2022-23 Budget includes an augmentation for a conversion of a part-time Facility Maintenance Coordinator to full-time, providing the Department with a total of 3 full-time facility maintenance staff. This addition will better position the Department for effective oversight of the 6 Community Centers and 9 satellite buildings managed by Parks and Recreation as well as planned facilities on the horizon.

#### PAY-TO-PLAY PROGRAMS

Adult Sports is excited to expand programming with new offerings such as Golf, Disc Golf, and Outdoor Pickle Ball programs. There are also plans to revamp the Adult Softball program to better reflect community wants and needs.

Youth Sports aims to empower Vacaville's youth while providing a fun and safe environment to promote healthy and active lifestyles, with the goal that these positive behaviors carry over into adulthood. For Fiscal Year 2022-23, Youth Sports has plans to expand programming with Badminton Camps, Ice Sports, and revamps in Flag Football, Volleyball, and Skateboarding programs.

Cultural Arts also has a planned expansion in programming, offering new programs and classes centered on enrichment opportunities in music, arts, and dance. Plans for the upcoming year include a focus on public outreach and feedback via surveys, marketing,

and social media and new class offerings such as Country Line Dancing, Ballroom Dancing, Acrylic Painting, and Cricut cutting classes.

Aquatics programming provides high-quality experiences that promote a solid foundation of water safety knowledge and skills through aquatic-based activities. This year, Aquatics plans to expand and elevate successful programs such as 707 Diving by hosting the first ever dive meet competition at the Walter V. Graham Aquatic Center. In addition to expanded programming such as the Cardboard Boat Regatta and Private Party Pool Rentals, demand has also prompted increased class sizes and time slots to reduce waitlisted participants for swim lessons.

Special Interest staff focus on providing lifelong learning opportunities to Vacaville residents through acquiring new skills and knowledge, pursuing hobbies, and experiencing a sense of community. This is accomplished through newly introduced programs such as Imagine That where students explore the science used to solve crimes including DNA, fingerprints, and other activities that encourage critical thinking in a fun, engaging environment.

Gymnastics provides participants with experiences that promote physical development, muscular strength, flexibility, balance, and core strength. This year Gymnastics aims to rebuild a core group of dedicated and enthusiastic participants who represent the program in a positive manner, and enhance program offerings to be responsive to current trends. Gymnastics staff are focused on creatively introducing program offerings to increase participant levels to pre-COVID numbers such as Super Hero 101, Gymnastics and Hip-Hop, and Tumbling Tutus.

Early Childhood Enrichment has a mission of providing children with strategies that help them develop the emotional, social and cognitive skills needed to become lifelong learners. Staff in this area will accomplish this objective by offering engaging programs to the public such as Summer Preschool, Art Play Group, and Mini Melody Makers that encourage self-confidence and self-esteem for participants while having fun and developing new friendships.

Youth Services staff work to provide enrichment opportunities to the youth of Vacaville through before and after school programs, camps, and classes that encourage social activity, reinforce the importance of education, build confidence, and promote health and wellness. In Fiscal Year 2022-23 Youth Services will expand its programming through offering field trips and guest presentations at each after school program site and streamline its registration and payment process through a fully-online registration system.

#### **COMMUNITY WELL-BEING PROGRAMS**

Teen programs provide recreational and learning opportunities that allow teens to express themselves in a safe, structured environment which promotes positive social interaction, teaches leadership and responsibility, and helps teens to realize their role as responsible young adults. Staff in this program area are focused on boosting attendance of

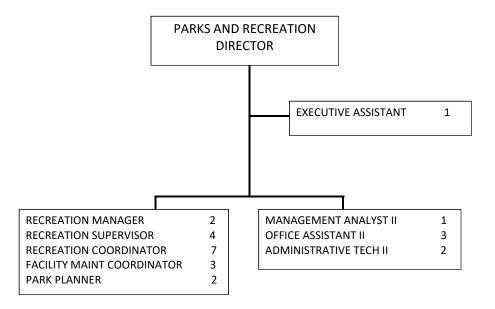

participants, vendors, and panels for Vaca-Con, and developing and facilitating a quality teen leadership program.

Active Aging offers programs to increase the health and well-being of adults 50 and over through participation in diverse recreational experiences. In the upcoming fiscal year, this program area aims to expand day trip opportunities and increase the amount of fitness programs to counteract the social, emotional, and physical impacts of isolation during COVID restrictions.

Therapeutic Recreation provides people with unique abilities of all ages recreational opportunities that enhance quality of life. Therapeutic Recreation staff will continue partnering with agencies and businesses throughout Solano County to promote program awareness and broaden resource support that has resulted in the success of programs like the Sensory Room, which reached maximum capacity and now offers additional sessions to meet demand

Special Events delivers community-oriented activities that provide positive experiences for residents of all ages and backgrounds while enhancing sense of place and Vacaville pride. Some highlights for the upcoming year include the CreekWalk, with hopes to introduce a cashless payment system to streamline the entry process as well as hosting Rose Royce at the season finale concert. Staff will continue partnerships with vendors to host events such as Día de los Muertos and will persist in cultivating relationships with local businesses and sponsors that provide vital support to the program.

### Police Department

The members of the Vacaville Police Department take great pride in the excellent level of service and safety we provide to the citizens of Vacaville. The police department faced a number of challenges in FY 21/22. Just before the start of the fiscal year, retired Fairfield Police Department Chief Joe Allio stepped in as the interim Chief of Police while a permanent Chief was selected. Along with an interim Chief, other command staff positions were covered by acting positions. During this time the police department faced an unprecedented number of retirements which led to a staffing crisis. Along with retirements, the ongoing COVID-19 pandemic led to increased staffing challenges. Throughout these challenges, the members of the Vacaville Police Department continued to provide excellent service and safety to the citizens of and visitors to Vacaville.

During FY 21/22, the department created the District Commander Program. With the recent creation of six City Council districts, the police department assigned one lieutenant and one sergeant to be the district commander for each of the council districts. This program has enabled residents, business owners, and council members for each of the districts to have direct points of contact, within the police department, to address issues in their district. The program has been very successful, allowing the commanders to engage directly with community members in their districts.

During FY 21/22 the department began participating in a comprehensive audit through an objective evaluation of the police department to ensure it operates consistent with best practices, enhances accountability and contributes to the greater openness with the public related to departmental processes and procedures. The city selected the OIR group to conduct the audit. OIR has visited the department, observed department training, and interviewed multiple department and city employees, as well as city elected officials. The final audit report is expected to be delivered in July of 2022 and the Police Department looks forward to reviewing the findings and using them as a roadmap moving forward.

In January of 2022 Captain Ian Schmutzler was selected as the new Chief of Police. Chief Schmutzler was able to bring additional stability to the department by, within the first two months as Chief, promoting two captains, one lieutenant, and one sergeant. Chief Schmutzler quickly identified three priorities within the department. Those priorities are: employee wellness, recruitment and retention, and employee development. Some of the ways the department has focused on these priorities are:

#### **Employee Wellness:**

- Actively seeking new employee wellness service providers.
- Enhancing our peer support team.
- Bringing care providers into the police department headquarters to identify the needs of employees.

Taking steps to address and improve employee wellness supports the City of Vacaville Strategic Plan Initiative 4C: Build a Positive Organizational Culture and Workforce

#### **Recruitment and Retention:**

- The recruitment team has attended recruitment events and traveled to police academies, military bases, and other public events up and down the state.
- The city authorized a \$20,000 hiring incentive for lateral police officers and academy graduates.
- The police department recently contracted with a marketing company to produce a new recruitment video.
- A new recruitment website was created. The website includes a section for recruiting professional staff and a professional staff recruitment video.
- The take home car program has been expanded to allow officers living outside of town to take their assigned cars home.

Prioritizing recruitment and retention supports the City of Vacaville Strategic Plan Initiative 4C: Build a Positive Organizational Culture and Workforce as well as Initiative 1A: Manage Changing Paradigm for Police.

#### **Employee Development:**

- A number of our future department leaders were sent to the Women Leaders in Law Enforcement conference. The group consisted of a good cross section of the department, including both sworn and professional staff.
- Prior to a recent sergeant promotion process a large-scale mock interview process was staged to help candidates prepare for the testing process.
- After the testing process, command staff members met with each person on the promotion qualified list to provide them with direct/specific feedback about their promotion potential as well as guidance on a path to promotion.
- Due to the success of the patrol corporal program in developing officers for promotion, the corporal program is being expanded to include one corporal assigned to each specialty unit.

Prioritizing employee development supports the City of Vacaville Strategic Plan Initiative 4C: Build a Positive Organizational Culture and Workforce as well as Initiative 1A: Manage Changing Paradigm for Police.

#### **BUDGET HIGHLIGHTS**

In fiscal year 21/22, the City established a Public Safety Equipment Replacement fund to address and plan for the vital equipment needs of our public safety departments. The Police Department used this funding to enhance services provided to the citizens of Vacaville in various ways described below.

Transparency, Accountability, and Criminal Investigations: The police department negotiated and extended our contract with Axon, LLC for ten years. Axon provides the police department body worn cameras, dash cameras, electronic control devices, and evidence data storage. Every sworn officer in the department is now provided with a body worn camera. Every patrol car is equipped with a dash camera, and patrol cars with prisoner transport compartments are equipped with cameras in those compartments. The contract with Axon allows the cameras to be replaced at regular intervals, ensuring Vacaville is provided with the latest technology. The Axon contract also allows investigators to send Axon citizen links to crime victims and witnesses. These links allow citizens to send digital evidence directly to Axon servers for inclusion as evidence in the investigation. The continued investment in body camera and dash camera technology ensures the police department is continually advancing City of Vacaville Strategic Plan Initiative 1A: Manage Changing Paradigm for Police

Technology and Interoperability: in FY 21/22 the Police Department continued its ongoing project of transitioning to a fully digital P-25 Motorola radio system. This project has modernized the department's radio system and allowed for extended range radio transmission, fewer radio dead spots, and increased interoperability among Solano County public safety agencies. In the early phases of the project all of the oldest radio equipment, which was incompatible with the new system, was replaced. In FY 21/22 more car and portable radios were ordered to work toward complete modernization of the radio system. Due to production delays, the radios order for FY 21/22 have not yet been delivered, but the project is ongoing. The radio project involves both the Police and Fire Department. The investment in updated radio technology supports City of Vacaville Strategic Plan Initiative 1B: Manage the increasing call volume for Fire and EMS.

Tactical Response: In 2021 alone, the Vacaville Police Department Special Weapons and Tactics (SWAT) team was activated approximately 30 times. This is an unprecedented level of activity for the police department's SWAT team. These activations encompassed incidents such as search warrants, arrest warrants, barricaded subjects, searches for outstanding criminal suspects, and on one occasion, a barricaded double homicide suspect. With our SWAT team engaging in such a high level of activity, their equipment needs regular upgrade and/or replacement. Equipment such as ballistic helmets and body armor have manufacturer expiration dates of five

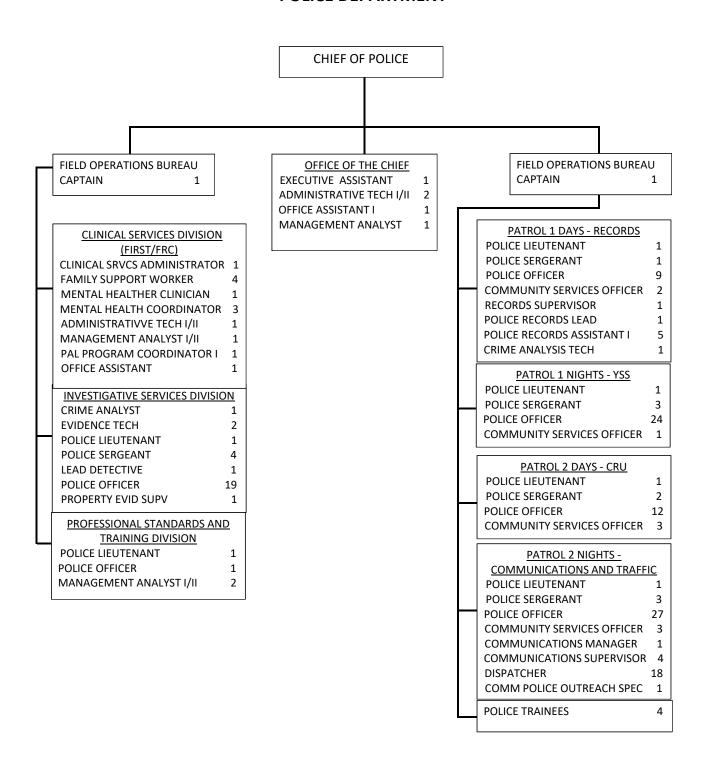

years. The existing SWAT rifles were over ten years old and had reached the end of their service life. In FY 21/22 funds from the Public Safety Equipment fund were allocated to replace various SWAT equipment. The substantial increase in SWAT deployments has a direct correlation to the continued growth of the City of Vacaville. The investment in SWAT equipment is consistent with City of Vacaville Strategic Plan Initiative 2B: Manage Impacts from Growth.

For the upcoming fiscal year, the police department has requested funding to hire two new public safety dispatchers. These new dispatchers will ensure the police department 9-1-1 communications center has adequate call-takers available during the day and evening hours. Current staffing leaves gaps during the day in which one dispatcher is responsible for handling all fire dispatch as well as answering incoming 9-1-1 and business line calls. These additional dispatchers will help fill those gaps.

For fiscal year 22/23 the police department has also requested funding to repair and replace a number of city surveillance cameras as well as to add 15 new cameras to the current system. These additional cameras will bring the total to 60 city-wide surveillance and Automated License Plate Reader (ALPR) cameras. Since the police department began deploying the intersection and ALPR cameras several years ago they have been instrumental in locating and identifying countless criminal offenders and the recovery stolen property, including a number of stolen vehicles.

The police department's intersection and ALPR program has been so successful we have been asked to spearhead a new city-wide camera committee. The aim of the committee is to add additional cameras to city facilities to protect property and safeguard the welfare of citizens and city employees.

### Public Works Department

The Department of Public Works includes four divisions: Administration, Engineering Services, Traffic Engineering and Maintenance. These divisions design, develop, and maintain the infrastructure of the City, including parks, streets, water, sewer and storm drainage systems, City buildings and facilities, street signs, traffic signals, and striping and also manage essential services including solid waste, recycling, and public transit.

#### Administration

The Administration functional area of the Department is responsible for strategic planning and oversight, and monitoring the daily activities necessary to maintain an effective, efficient and responsive operation including financial planning and control, community engagement and customer service, and performance management. The Division is also responsible for recycling, solid waste franchise, and Americans with Disabilities (ADA) coordination.

#### **Engineering Services Division**

The Engineering Services Division consists of the Capital Improvement Program (CIP), Construction, and Development Engineering Sections. Capital Improvement Program and Construction provide the design, inspection, contract administration for all CIP projects, and construction inspection for private development projects. Development Engineering provides land development services to support private development and is responsible for the review and approval of subdivision maps, subdivision improvement plans pertaining to public infrastructure, and the preparation of benefit/assessment districts.

The majority of the Engineering Services budget is funded through direct charges to the funding that supports individual Capital Improvement Program (CIP) projects. The Engineering Services budget is also funded through charges to land development projects supported through plan check and inspection fees paid for by developers.

#### Traffic Engineering Division

Traffic Engineering is responsible for traffic operations, long range traffic modeling and planning, and roadway and traffic signal design. The Traffic Engineering Division is also responsible for the repair and preservation of the City's traffic signals. The primary sources of funding for the Traffic Engineering Division are General Fund and Traffic Impact Fees.

#### **Maintenance Division**

The Maintenance Division is made up of Streets and Field Utilities, Parks Maintenance, and Fleet and Facilities. The Division is also responsible for City Coach transit services and central stores. The primary mission of Maintenance includes the repair and preservation of all City owned infrastructure and facilities, including water and sewer systems, streets, sidewalks, street lighting, parks, setback and median landscaping, city buildings, and all rolling fleet and mechanical equipment.

The primary sources of funding for the Maintenance Division are Water and Sewer Utility fees, General Fund, Gas Tax, Landscape and Lighting Maintenance Districts, and State and Federal Transit funds (TDA/FTA).

#### **BUDGET HIGHLIGHTS**

The 2022/23 Public Works budget includes the following augmentations to the above divisions:

#### **Positions:**

In the fall of 2021 and continuing into the spring of 2022, the Public Works Department went through a comprehensive organizational analysis performed by a third-party consultant. The goal of the study was to identify both strengths and areas of improvement and to set the foundation for a more effective City of Vacaville Public Works Department. The consulting group reviewed existing performance metrics, performed interviews and surveys and analyzed the organizational structure while weighing the data against industry best practices and comparable factors to other Public Works departments. The analysis resulted in a draft report that the department has used to consult with the City Manager and Human Resources to request positions in this years' budget cycle identified to better balance the demands of Public Works with staffing resources.

#### **Public Works Superintendent**

Since the year 2000, the City has added over 50 new residential developments, over 250,000 linear feet (47 miles) of water service infrastructure, 240,000 linear feet (45 miles) of sewer service infrastructure, and hundreds of new street miles now totaling 276 street miles (618 Lane Miles). In addition to the infrastructure expansion, regulatory oversight has increased proportionally requiring significant oversight to maintain compliance. The requested additional Public Works Superintendent position, funded by Measure M, will help to address the staffing need to ensure efficient and effective maintenance of the City's growing infrastructure inventory.

#### Administrative Technician I (Transit)

The City's Transit Program currently is administered by two staff members. Public transit program management today requires a higher degree of local and regional coordination along with the administrative office technical skills to meet that higher threshold, in addition Federal Transit Administration (FTA) regulatory requirements have broadly increased requiring significant ongoing

time to compile, maintain and report to FTA. The third transit staff member, funded via Transportation Development Act funds will help to balance the workload and ensure the highest level of efficiency is achieved.

#### **Maintenance Worker (Qty. 2)**

The maintenance of the City's 276 street miles (618 Lane Miles) is currently performed by nine (9) staff members. From 2000 through 2020, the City has added well over 245,990 linear feet (47 miles) of street roadway including the corresponding traffic safety control devices, striping and graphics and curb/gutter infrastructure. This Measure M augmentation request is for two (2) additional Public Works street maintenance workers to begin addressing the City's growing roadway inventory.

#### Office Assistant - Conversion

Since 2018, the City's fleet has increased from 565 vehicles and equipment to 644, a 14% increase in fleet size. As the fleet has grown, so too have the back office demands to ensure regulatory compliance and processing of work orders, purchase orders and balance monitoring, warranty tracking and customer service to the City's internal departments. This Internal Service Fund augmentation request for the conversion of a Part Time employee position to a full-time position will allow the City's Garage to stay abreast of the City's growing fleet inventory and associated back office demands.

#### **Public Works Supervisor – Fire Equipment**

To ensure compliance with National Fire Protection Association (NFPA) guidelines, the City now faces the need to recruit an NFPA certified Fire Equipment Mechanic – starting at the Supervisor level. This position is needed to mitigate equipment downtime and thereby ensure higher levels of equipment operational availability across the Fire fleet. This General Fund augmentation request will allow the City to begin to meet the demands of the City's Fire Fleet maintenance.

#### **Asset Management/GIS Technician**

This General Fund augmentation request is to add an Asset Management/GIS Technician to the Public Works Engineering Services Division. Public Works Engineering Services does not currently have any GIS technical staff to manage the multitude of GIS related tasks and responsibilities. This position will be dedicated to GIS data analysis and asset management; ensuring Public Works generated GIS data is updated, performing analysis of the data, and creating reports and mappings.

<u>Citywide Landscape and Lighting District Feasibility Analysis:</u> The City of Vacaville manages 134 LLMD's consisting of Neighborhood and Community Parks, Street Landscape Areas, Drainage and Detention Basins, Open Space and Street Lighting. For the past several years, financial challenges have begun to impact various Neighborhood Park and Setback Landscape Districts resulting in financial imbalance; in regard to Neighborhood Parks that imbalance requires a significant subsidy from the City's General Fund. This one-time augmentation request is to conduct

a feasibility analysis of the various options for a citywide LLMD along with a public opinion survey to gauge public opinion on a citywide LLMD which would trigger a Proposition 218 vote. The funds for this augmentation are included in non-departmental.

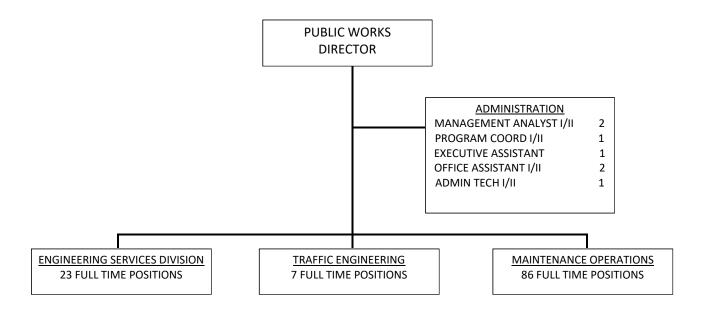

<u>Walter Graham Aquatic Center:</u> This augmentation request for ongoing funding for the maintenance of the Walter Graham Aquatic Center, in particular to cover the cost of pool chemicals and the maintenance of the City's aquatic center.

<u>Play-4-All Park Maintenance:</u> City staff have been made aware that Play-4-All Park is likely to transition from construction to the hand-off of maintenance to the Public Works Department. As such, this augmentation request is being made to cover the maintenance of landscaping, turf grass, restrooms, 8,000 square feet of playground area, picnic areas, water feature, drinking fountains and park lighting. As Play-4-All Park is entirely different from any park in the City's park inventory, this initial request is being made as a single year, FY2022-2023 augmentation request; over the course of the next 2-3 years, Public Works will accumulate additional facility expense data which will be utilized to implement a more refined budget for future years.

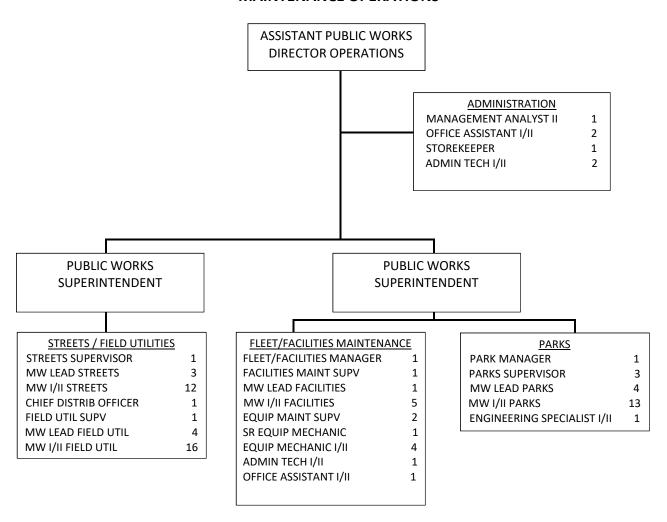

<u>Traffic Safety Street String and Graphics:</u> This augmentation request for ongoing funding is to allow Public Works Maintenance to annually install additional roadway striping and legends across the City's 618 lane miles.

<u>Trash Amendments Compliance Consultant Assistance:</u> The California State Water Resources Control Board has updated the State's Water Quality Control Plan for Ocean Waters of California through the 2015 Trash Amendments regulation. The Trash Amendments require permitted stormwater dischargers, such as the City of Vacaville, to implement plans to limit discharge of trash into the City's stormwater system. To comply with this regulatory requirement, the requested one-time augmentation will allow Public Works to contract a consultant to begin the efforts required to ensure regulatory compliance.

### Utilities Department

The Utilities Department acquires, treats, and delivers clean drinking water to Vacaville's customers. The Utilities Department also collects, treats, and environmentally disposes of Vacaville's wastewater and biosolids. The operation of the water treatment facilities and the wastewater treatment facilities are regulated through permits issued by the Division of Drinking Water (DDW) and the Central Valley Regional Water Quality Control Board (RWQCB), respectively, of the State Water Resources Control Board. These agencies establish standards and monitor compliance through frequent reporting and onsite inspections to ensure that water quality, water conservation, public health, and environmental concerns are addressed.

#### **BUDGET HIGHLIGHTS**

#### **Water Operations and Maintenance**

The Water Operations and Maintenance Fund (Water Fund) provides funding for water operations and maintenance expenses; water management, water quality, backflow prevention, and conservation programs; major equipment and distribution system repairs and replacements; debt service payments for the citywide upgrade of residential water meters; and contributions to project accounts established for major facility and system repair and rehabilitation.

The proposed Water Fund budget for FY 22/23 results in an operating deficit for the year with projected revenues at \$25.3M, and projected expenses at \$26.5M. The budget reflects increases of \$1.5M in operating expenses and an increase of \$100,000 for anticipated maintenance and repair projects in our Distribution system. The largest expenditure increase for this year will be \$2M for major repair and replacement projects.

The FY 22/23 budget reflects the Department's continuing efforts to manage expenses over the last five years, including performing work in-house and deferring non-essential maintenance projects and purchases. These expenditure reductions, combined with revenues generated from the last water service rate increase approved in 2016, has enabled the Department to gradually eliminate a water fund deficit that stood at \$10.9M at the end of FY 11/12. In FY 20/21, the Water fund ended the fiscal year with a net positive working capital of \$4.7M. As a result, the Department will be able to cover the projected FY 22/23 operating deficit through the use of reserves.

The Fund continues to face challenges over the next few years as the costs of raw water, energy, chemicals, and operating expenses at both the City's Diatomaceous Earth (DE) Water Treatment Plant and the North Bay Regional (NBR) Water Treatment Plant

continue to rise. In addition to these expenses, a total of \$3M will be set aside in this fiscal year to address major repair and replacement projects necessary to maintain our operations. A continued challenge for the Water Fund will be the replacement of up to 28,000 water meters that are projected to reach the end of their service life in the next seven to ten years at a potential cost of approximately \$19M.

In order to plan for and address these upcoming revenue and expenditure considerations, a water service rate study has been commissioned to assess, evaluate and recommend options for addressing not only these issues but the upcoming state water conservation measures in which water loss, as well as indoor and outdoor per capita water usage standards, may have a potential impact on revenues in the coming years. The goal of the study will be to recommend measures that maintain a positive cash flow and the integrity of the Water Fund while working towards the establishment of an operating reserve. The study is scheduled to commence in May of this year.

#### **Wastewater Operations and Maintenance**

The Wastewater Operations and Maintenance Fund (Sewer Fund) budget provides funding for wastewater operations and maintenance expenses; biosolids treatment and disposal; pretreatment and source/environmental control, storm water management; wastewater quality control and permit compliance; major equipment and collection system repairs and replacements; and contributions to project accounts established for major facility and system repair and rehabilitation.

The proposed budget for FY 22/23 results in an operating deficit budget for the year with projected revenues at \$34.6M, against projected expenses of \$38.4M. The Sewer Fund budget reflects increases of \$2.4M in operating expenses as well as a \$2M increase for major repair and replacement projects. A major specialty equipment vehicle to support our sewer operations system will be purchased through the Fund this year.

The major contributor to the expenditures in the Sewer Fund is the Easterly Wastewater Treatment Plant Tertiary Project. The Tertiary Project was budgeted at \$149M and a rate increase was approved in 2010 in order to provide initial funding for the project and to procure and repay a loan from the State Revolving Fund (SRF) needed to construct the project. As a result of increased revenues, the Sewer Fund has built a fund reserve which at the end of FY 20/21 stood at \$28M. This reserve has been used to make the annual SRF loan payments of \$7.1M. Although the loan payments were expected to be repaid equally between the Sewer Fund and Sewer Development Impact Fee Fund, the Sewer Fund has picked up the entire cost of the loan payments to date. These loan payments are presently scheduled to be made through FY 2035/36.

Similar to the Water Fund, the Sewer Fund proposed budget for FY 22/23 reflects the Department's efforts to manage expenses while addressing critical operating and infrastructure needs. However, since the Sewer Fund has continued to maintain reserves

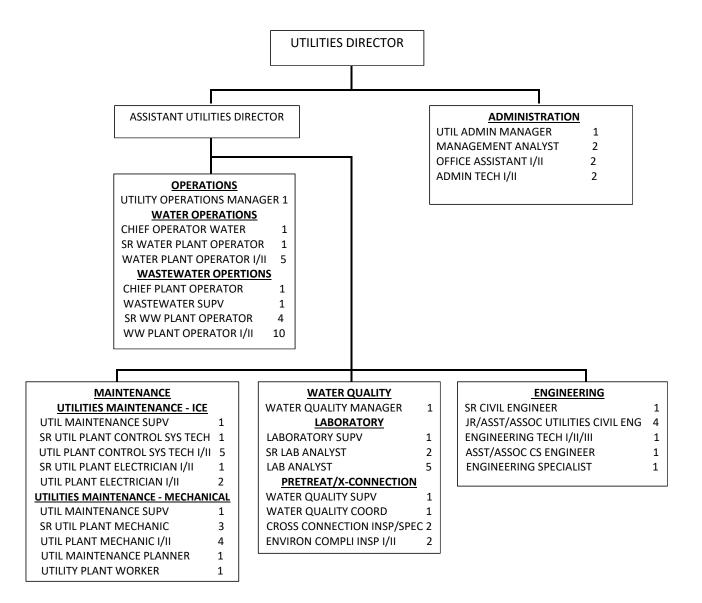

to cover both debt service payments and operating expenses, the projected operating deficit for FY 22/23 will be covered by operating reserves.

Since there has not been a Sewer rate increase since 2014 revenues have remained relatively flat. Consequently, increased operating and maintenance expenses, in addition to the Tertiary Project loan costs, have steadily been outpacing revenues. As future loan payments are made against the Sewer Fund balance, the balance will continue to decrease. Coupled with increasing operating and maintenance project expenses, the Wastewater Fund balance is projected to eventually go into a deficit balance without either an increase in revenues or reduction in expenditures.

In order to plan for and address these upcoming revenue and expenditure considerations, a wastewater service rate study has been commissioned to assess, evaluate and recommend options and recommendations. As with the water service rate study, the goal of the study will be to recommend measures that maintain a positive cash flow and operating reserve for the Sewer Fund. The study is scheduled to commence in May of this year.

Reconciliation of the Tertiary Project will evaluate the most cost effective options for making the debt service payments and will include the results of a current study of the City's Wastewater Development Impact Fee. It may also consider debt restructuring and/or refinancing options, and appropriate "fair share" contributions from new development proposed in the 2015 Vacaville General Plan Update. The goal will be to reduce annual debt obligations on the Wastewater O&M Fund and maintain the Fund's current positive annual cash flow and to maintain and build an operating reserve.
